## **Personal Statement**

---

A recent BSc (Hons) Software Engineering graduate and freelance web developer based in the UK, with a strong foundation in full-stack web development gained through both academic study and real-world client projects. Experienced in designing and delivering responsive, user-focused web applications, translating business requirements into practical technical solutions, and working across the full development lifecycle.

Currently supporting local businesses as a freelance developer, building modern, accessible websites while developing strong problem-solving, communication, and client-facing skills. Now seeking a graduate or junior software development role to further develop technical expertise, contribute to a professional engineering team, and gain experience working on production-level systems.

## **Experience:**

---

### **Freelance web developer | 2025 - Present**

- Developing responsive websites for local business.
- Working with React.js, Node.js, Tailwind CSS, PostgreSQL and more.
- Collaborating directly with the clients to deliver tailored solutions.
- Independently managing projects, ensuring timely deliveries and client satisfaction.

### **Team member | home bargains | 2021 – present**

- Ensuring clear and effective communication with customers, management and other staff.
- Performing opening duties, including store cleaning/preparation and restocking
- Maintain high standards of customer service.

## **Education:**

---
